True the Vote, the investigators behind the 2000 Mules Documentary, released information about their findings about Konnech on their OPEN.INK website ( [TOOLS > PROJECTS on our website](#)), and 2 days later, Konnech dropped their defamation lawsuit against TTV. The personal data of 1.8 million Poll Workers across the country were being kept on servers in China. Los Angeles has hundreds of terabytes of data in evidence from when the CEO was arrested last year. A former employee of Konnech testified that they were told to lie about whether the information would be shared. TTV is fighting to get Konnech’s software removed from counties all over the US. Dekalb county, in spite of the controversy recently renewed a contract with Konnech, and are possibly the only Georgia county to still be under contract.(article about Dekalb [STATE OF GEORGIA NEWS page on our website](#) ) The Soros funded LA District Attorney is objecting to VoterGA’s subpoena of Konnech’s servers. New information is found that Konnech has had some of the same employees, and password-less connections as SCYTL, another shady company who receives election results and returns final counts (the numbers reported on the news banners).
